PROFILE

As a passionate and skilled Full Stack MERN Developer, I thrive on creating dynamic web applications that deliver exceptional user experiences. With a solid foundation in MongoDB, Express.js, React, and Node.js, I bring innovative solutions to life. My expertise in front- end and back-end development allows me to seamlessly integrate features, ensuring robust and scalable applications.

WORK EXPERIENCE

Website Admin and Graphic Designer

Total Business Shop   2020-2022

- I was responsible of all the administration in the website
- I was making designs to ads and products, makings promotions
- Managing sales and update the website every month with new functionalities
- I Collaborated with various departments to create unique and engaging content and landing pages
- Consulted users about site experiences to determine areas in need of improvement.

Website Admin

SimtechSn   October 2023 - Now

- Kept software updated with latest security patches and optimal configurations.
- Prevented complex site problems with proactive hardware maintenance program.
- Improved site structure and usability by coordinating the work of developers and quality assurance teams.

Web Developement Instructor

GoMyCode   November 20230 - Now

- Taught undergraduate and graduate-level content small and large class sizes.
- Planned program of practical instruction to meet individual and group needs.
- Used variety of formative assessments to gauge student learning, adjust instruction and provide timely feedback.
- Made Worshops for better understanding of coding for my students.
